

## Leadership and Management Courses

Course Name	Hours	Course Description	Express ID#	Cost/Person
<b>ESG Know-How: ESG for Material Selection</b>	2	This course includes an introduction to ESG (environmental, social, and governance) essential terms, metrics, and frameworks and discusses how ESG differs from (but overlaps with) traditional green building models. This course also provides a hands-on exercise. Referencing publicly available ESG reports, participants will assess product manufacturers' commitments to decarbonization, employee well-being, environmental stewardship, and supply-chain risk management. How do these companies follow through on their commitments, and do their product offerings align with the clients' own ESG goals? This course is for building industry professionals. It can be held virtually or in-person and is a combination of presentation and discussion.	—	\$175
